

# BEEUDA BLUEPRINT

- ▶ The First-Ever Truck Builder Crypto Project

## Goals

Promoting and Building eco-friendly Technology  
Using blockchain technology

We hope to contribute to the global effort in creating sustainable energy system for future, generation.

# Why Trucks

We choose truck building because it's considered as one of the highest environmental pollutant. We believe by using the power of blockchain technology, we can create a Truck green energy grid.

## Beeuda Truck Building Objective

We are not only building eco-friendly trucks but also road safe trucks

# BEEUDA and the Electric Truck Revolution

Trucks have a major impact on global warming, the air we breathe, and the safety of pedestrians, cyclists and other road users.

While only accounting for 2% of the vehicles on the road in the European Union, trucks are responsible for 22% of road transport CO2 emissions and 15% of road collision fatalities, which is 4,000 EU citizens a year.

Road freight transport is projected to increase by 56% between 2010 and 2050. This means Europe needs to tackle truck emissions urgently to decarbonise transport.

The good news is that the EU is acting and that technology is developing rapidly too. Europe's first truck CO2 standards were agreed upon in 2019. In another first, Europe also agreed a 'direct vision' standard for trucks in 2019, along with design changes to enable truck-makers build safer and more aerodynamic cabs. But much, remains to be done.

Beeuda is using the power of cryptocurrency to engage in the EU's vision of bringing more eco-friendly trucks to the road. We hope to build new trucks that are not only eco-friendly but also road-safe for cyclists and people.

We will achieve this by building partnerships with existing companies in same space. While we consider plans of customising existing electric truck to meet Build specification.

Partnerships is process that is ongoing and is considered carefully, so that so we only partner with firms that have long term commitment of going Zero carbon by 2050.

# Our Eco-Friendly Strategy

The Blockchain and Cryptocurrency Way

BEEUDA (BDA) TOKEN WILL BE USED FOR  
Bidding & Purchasing Prototypes of Eco-  
Friendly Trucks

Supporting and promoting road safety  
projects.

As an incentive token to create awareness  
on the need for eco-friendly and safe trucks

As an incentive token to support Truck  
drivers and the truck community

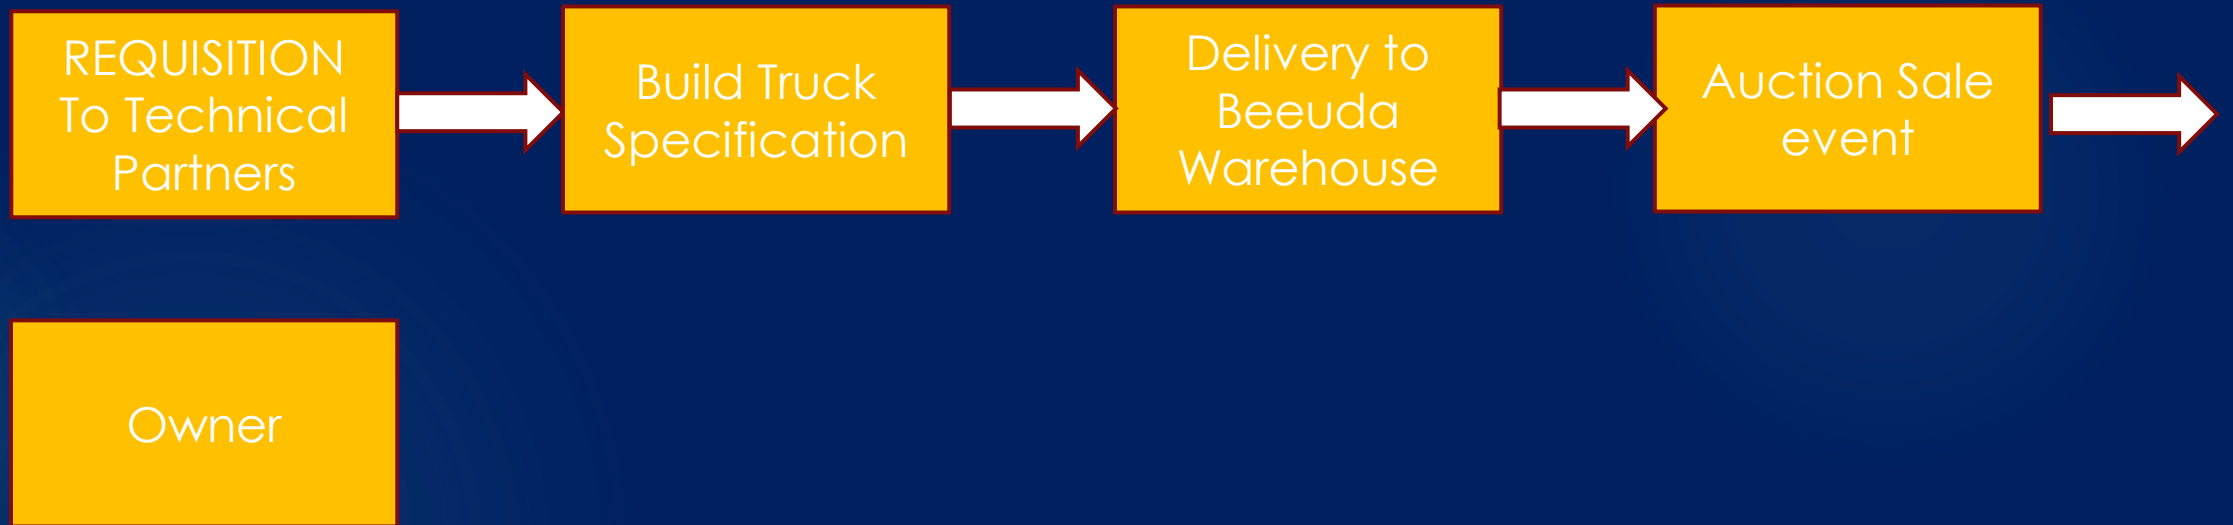

CREATING A SAFE PLANET FOR THE FUTURE  
GENERATION

Beeuda NFT Marketplace  
Beeuda Space Truck Metaverse

# Supply Chain Model

# Partnership and Agreements Prototype

Maintaining quality partnership is at the core of our decision making process.

Building our eco-friendly trucks will require technical partners that will be building.

Our strategy in this respect is to choose partners that have long term commitment for eco-friendly technology and a plan to go carbon neutral by 2050.

We are currently in discussion with truck 2 manufacturers in China and working on a model for our first prototype.

Announcements will be made as soon a partnership agreement has been reached.

# Beeuda NFT

## **BEEUDA NFT MARKETPLACE**

Allowing users to buy and sell NFTs within the Binance Smart Chain Ecosystem

Trucks are represented by a non-fungible token(NFT), where owning this token means you are the sole owner of this truck.

# NFT Prototype

We hope you like our First NFT and Mascot.

Meet Beeuda. Beeuda is on a mission to save the planet and make #OneEarth safe now and in the future. Beeuda is promoting and Building eco-friendly trucks

This is a feature we are constantly developing on, and testing its suitability, Our NFTs will promote green energy and support our Truck Projects,

Revenues from sales of NFTs will be utilized in building more trucks according to EU's specifications on Eco Friendliness

# METaverse SNEAK PEAK

Beeuda wants to also make sure the Metaverse is safe for everyone, people will be able to assume various roles in the Metaverse, including owning homes, driving Beeuda space trucks, with attractive rewards

## Beeuda Space Truck Metaverse

Let's build a cleaner and better future together
